

This Ain't your Average Science Class!

Imagine plugging into your brick house! Red bricks can be converted into energy storage units that are charged to hold electricity, like a battery. Don't believe it?

[CLICK HERE](#) to learn more! They don't teach this in science class.

It's a Bird...it's a Plane...it's SUPER DRONE!

Actually, it's a **coronavirus killing drone...say that ten times fast!**

Syracuse startup, EagleHawk, has developed a drone that can spray disinfectant to quickly kill the coronavirus in stadiums, construction sites and other large areas.

[CLICK HERE](#) to watch how it's done. It's fascinating.

Need some new recipes for the Quarantine Cocktail?

With stress levels running high, kids doing virtual school, and stay-at-home orders still in place, happy hours are needed more than ever! Here is some advice on how to make tasty cocktails with everyday ingredients, straight from the *Philadelphia Inquirer!*

Sidebar: they make it look so easy!
