

This could be your home office for a mere \$30M.

This self-powered rotating tower, located in Dubai, was inspired by our very own Olympic Tower in New York.

The Dynamic Tower is introducing a fourth dimension to architecture. Using independently rotating floors, the building's shape evolves with time, changing direction from sunrise to sunset to reflect modern dynamic living and creating a unique, evolving architectural landmark.

Each villa comes with its own waterfront swimming pool, sauna, home theatre and a parking space at the entrance. **Road trip anyone?**

Masonry: New Construction & Restoration

The 4th & 5th year **Construction Management** students are learning the **mason contractors** process from start to finish. They are gaining insight into the entire project: bid, estimating, additional expenses, risks and construction administration responsibilities.
